

What?

Get Out Get Active: A person centred approach

Reaching the very least active disabled and non-disabled people in activity together requires an approach that puts people first. To reach this goal we asked ourselves how we could:

- Reach some of the most inactive disabled and non-disabled people.
- Make a lasting change by converting the least active to active, and sustaining this change.
- Give participants the confidence to do more.
- Revolutionise the way that inclusive activity is viewed.

The answers came from going beyond demographics and groups - and taking a person-centred approach to help us to better reach, connect and engage individuals in activity together.
